## SANISHOWER

[Call for Pricing](#)

The Sanishower is a small grey water pump that may be used to pump waste water away from a shower, hand basin, bar sink, or other fixture. The Sanishower is small enough to fit inside a wet bar cabinet, or even beside or underneath a raised shower base. It also can be used in a variety of small gray water pumping jobs, such as a condensate pump.

The pump operates at 10 PSI and pumps the waste upwards to 12 feet (3.7 metres) and/or 100 feet (33 metres) horizontally. A normal operating cycle for Sanishower can be as short as 2-10 seconds depending upon the discharge pipe run configuration, therefore power consumption is minimal.

As a point of interest; quite a few pedicure manufacturers are putting the Sanishower inside pedicure chairs, due to its quiet operation and ease of installation, they have become the choice of OEM's.

Motor RPM	3600
Horsepower	0.2
Electrical Supply	110-115V; 60Hz;
Flow rate at max head USG/MIN	12 ft:14 usg/min; 3 ft:26 usg

Amperage (Consumption)"	3.5 AMP
Discharge Pipe Diameter	3/4" diameter
Vertical Discharge	12 ft
Horizontal Discharge	100 ft
Gravity fall on horizontal installations	1/4" per ft
Normal Running Time WC	10-15 seconds
Maximum Temperature	104°F
Dimensions (measured from floor level)	H5 3/4" x W11-5/8" x D6-3/8"
Materials	Polypropylene, C.R.P., stainless steel, Neoprene
